

METHOD OF INHIBITING STENOSIS AND RESTENOSIS

ABSTRACT OF THE DISCLOSURE

The invention relates to a method of inhibiting stenosis or restenosis in a subject.

- 5 In one embodiment, an agent which inhibits recruitment and/or adhesion of neutrophils and mononuclear cells to a site of vascular injury is administered to a subject in need thereof. In another embodiment, a first agent which inhibits recruitment and/or adhesion of neutrophils to a site of vascular injury, and a second agent which inhibits recruitment and/or adhesion of mononuclear cells to a site of vascular injury are
- 10 administered to a subject in need thereof. In particular embodiments, the agents are antibodies or antigen-binding fragments thereof which bind to CD18 or CCR2.
